close from the app**

BIKE HANGAR Rocket

***Build a secure
network of bicycle
parking stations in your city.***

Everything managed through an app.

Registered users have access to real time information of parking availability, can make a reservation via app, and can manage the time and money spent. The Bikehangar-Rocket opens via Bluetooth. No need of cards and physical key!

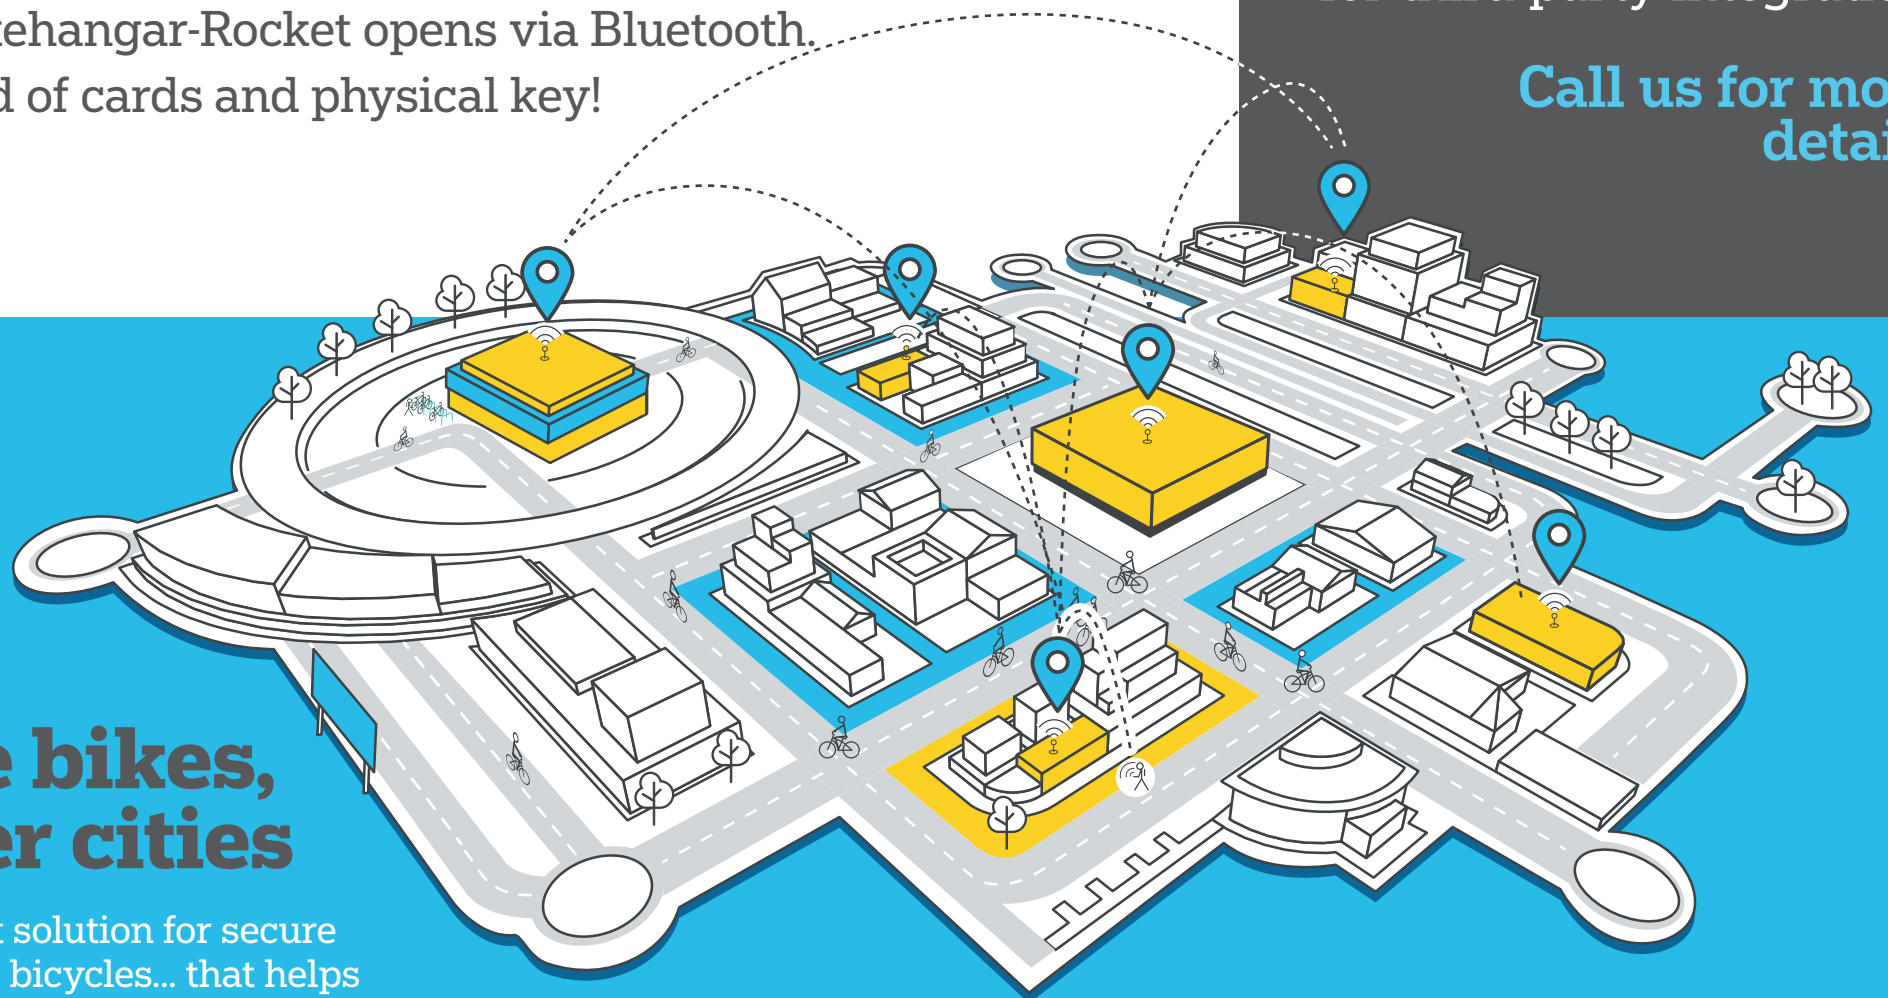

Our technology

can also be implemented in other parking systems.

APIS-based architecture for third-party integration.
